shows some but not limited to possible processes and functionality(ies) assembled or built or programmed into a typical Portal (Hub).

Note: EXAMPLE SHOWS ONLY SOME OF THE LAYERS OF FUNCTIONS OF A VERTICAL PORTAL (HUB).

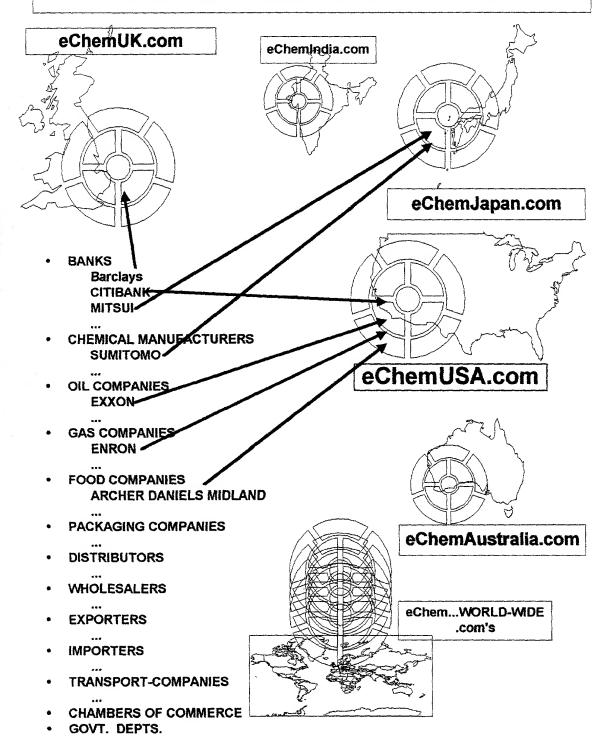

INTERNET / NETWORK CONNECTIONS Connected to all other Hubs, Portals, networks, systems,
etc.

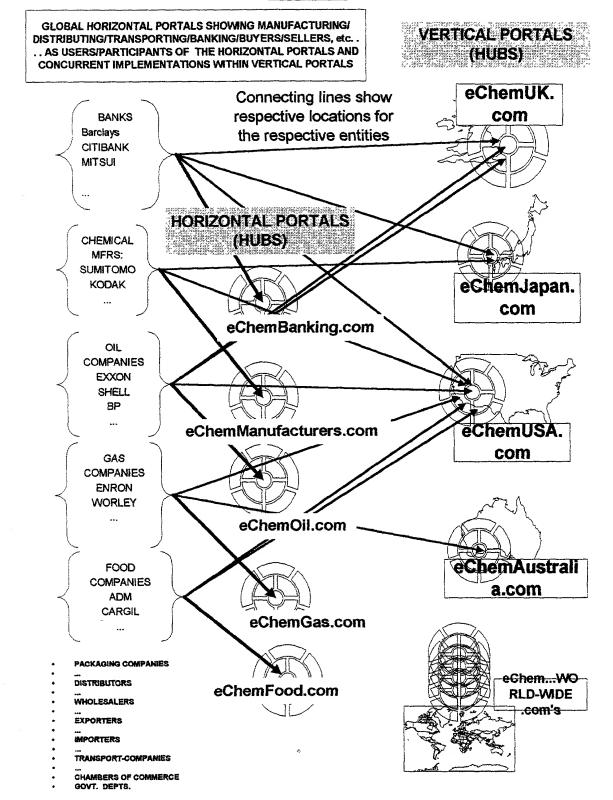

Note: As in above diagram and example, each of these and other Horizontal Portals would have respective and more categorical functions designed and built-in for its functionlity for the respective categories and industry/classification
